6. 30th Civil Engineering Squadron: (30CES)

Proper Ventilation: Due to our location mold and mildew can become a problem, but proper ventilation can prevent it. Turn on the bathroom exhaust fan and/or open a window in the bathroom during and after a shower or bath. If no window exists in the bathroom, leave the bathroom door ajar following the shower or bath and open windows in other rooms to create a cross draft for about 10 minutes. If mold and mildew manage to develop anyway, open windows in the affected area to facilitate drying, and scrub the area with a solution of one-cup bleach and one gallon of water, rinse and wipe dry. In the case of mold on painted surfaces, allow this solution to soak in before scrubbing lightly, rinsing and drying. If your carpet gets wet, dry it quickly to prevent the growth of mold under the carpet. You can use a fan directed at the wet area of the carpet to dry it and prevent the growth of mold. (30CES/CEH, 6-3477)
